

Lesson 6 - Water use in your home

(The Results)

Before you start this session, please:

- Print Session Information sheets
- Make sure you have access to the internet so that you can watch video clips on YouTube.
- Collect together the following items to help you complete the experiment and activities in this lesson.
 - A mobile phone ready to use (Water Battle app)
 - Paper and pens for designing the poster

Water use in your home

Let's get started

Over the past few sessions we have looked at how water is used in the home and explored different ways that you can use water wisely.

We are now going to look to see if the changes you and your family have made have had an impact on your water use and the reasons why we all need to do our bit to reduce the water we use.

Watch the video [Doing Our Bit](#) on the Education Playlist.

The video looks at the challenges facing our region, including population growth and our changing climate and how that might affect us.

It shows the steps that Anglian Water are taking. It is now your turn to try and help us.

Water use in your home

Are you waterwise?

You will have been recording your meter readings for the last two weeks and then produced a graph showing the changes in your use.

If you have used the Water Battle app then you will be able to see a graph showing water usage for each day.

- How has the water usage in your home changed over the past 2 weeks?
- Why do you think it has changed in this way?

Now create a storyboard (a sequence of cartoon drawings) to show how your family has changed their water use or how they could change their water use to be more efficient.

Water Warrior

We would love to spread your hints and tips, and information you have gained from your learning, with others across the region.

Anglian Water is looking to take the Water Battle app into schools across the region and we would like you to help us do this.

If you used the app, we would like to know what you particularly liked about it.

Design a poster to advertise the best features of the app for someone the same age as you. Think about what you enjoyed most about the app and the tips and hints you have learnt from the app.

Share your funky facts, water saving tips and hints, as well as your Water Battle posters with us at education@anglianwater.co.uk

If you haven't been able to download and access the app, Anglian Water have a water saving quiz which you can complete to give you some extra tips on how to use water wisely:
